

Making Exponential Cash with Free Porn

In this tutorial you will find an exceedingly simple way to begin earning revenue online. This method is for beginners, or for those who wish to begin moving in to the porn sector with as little requirements as possible. You will not find a more simplistic set of instructions anywhere. To begin, you will need the following :

- [Around 300 megabytes of short video porn videos.](#)
- [A Free Blogspot](#)
- [A SharingMatrix.com Account](#)
- [Memberships at various free porn forums.](#)
- [Porn Affiliate Program](#)
- [Image Grabber II](#)
- [Watermark Software](#)

The following is a very quick step by step guide on how to begin making money, but first let me explain the concept. You will be gathering [porn videos](#) from archive files like .zip, or .rar, and uploading them to [Sharing Matrix](#). [Sharing Matrix](#) then pays you for downloads of the file you've uploaded! It is a rather simple model, but then you will extend it. You will be using [Image Grabber](#) to make stills of your video, and then you will be posting both to free porn [forums](#). The beauty of this is that on the sites I've provided, the immense traffic they provide will keep steady downloads of your files all hours of the day.

If you want to take it a step further, you can make use of porn [affiliates](#). To do this, you simply need to [watermark](#) your [videos](#) using the [free watermark software](#) I provide, and offer a link to your [blogspot](#) on them. On your [blogspot](#) page, you will upload all of your porn and place some [affiliate](#) advertisements as well. All in all, this can have you earning within a few hours of setup. Now let's do it!

1. The first step is gathering a small collection of porn. I've included a starter pack for you in the links at the top. You can also find a nice supply of collections via your favorite torrent or newsgroup site. It wouldn't hurt to specialize and focus on one niche of the porn industry. The most downloaded porn is Amateur, which is why I've included all amateur clips in my pack.
2. Secondly, while your porn pack is downloading, you will want to set up your [blogspot](#), [sharingmatrix](#), your memberships on the [forums](#), and your [affiliate](#)(s). This is because it often will take them an hour or so to activate your accounts. Doing this first will save you some time and help you wrap up the whole set up in as little time as possible. I've included a nice list of popular [forums](#) in a text file for download at the top of this page, to save you time. I've also included a link to the easiest porn [affiliate](#) to sign up for, with one of the best returns for webmasters. They will not turn you down. All of the sign ups are pretty straight forward. You can follow the links provided by me at the top, or just find them on your own if that is your thing.
3. Now that you have your porn and memberships set up, you are effectively ready to start making money. If you want to make even more money by spending only a bit more time, you should start working on your [blogspot](#) at the same time. In order to do this, just use the freeware software I've included to put a [watermark](#) link to your [blogspot](#) site on each video.
4. Log in to your [Sharing Matrix](#) account and upload your [videos](#). I would suggest using an ftp client, but do this any way you feel comfortable. Anyways, while you upload the files feel free to move on to the next step.
5. Using [Image Grabber II](#), make a still set of each of your [videos](#). This is necessary for advertising them on most [forums](#), and also quite useful for your [blogspot](#). When you are finished with each, name them after the video file they are from. Upload each of them to <http://image.de/> and save the link

for each in a notepad text file.

6. Now that you have uploading each of your [videos](#) to [sharing matrix](#), and each still-image to [image.de](#), you can start posting them on [forums](#) and your [blogspot](#). Generally, on a [forum](#) you will want to make a post with the still image on top, and a link to your [Sharing Matrix](#) video download url inside the "Code" brackets. If you are confused, take a look at the other posts on the [forum](#). Also, post the still-image of your video on your [blogspot](#) linking to your video on [sharing matrix](#).
7. Litter your [blogspot](#) with [affiliate](#) ads from your chosen [affiliate](#)(s). I've included my favorite in the links at the top.

That is it! Every few hours, you may want to reply to your post on each [forum](#) to keep your post at the top. As you upload more and more [videos](#), your earnings will increase exponentially. Just remember to keep linking them all on the different [forums](#). This is a great building point for several other methods. You may even want to upload your [watermarked videos](#) to various tube sites like xtube.
